

SKM Mobile App

MySKM Cloud Projects

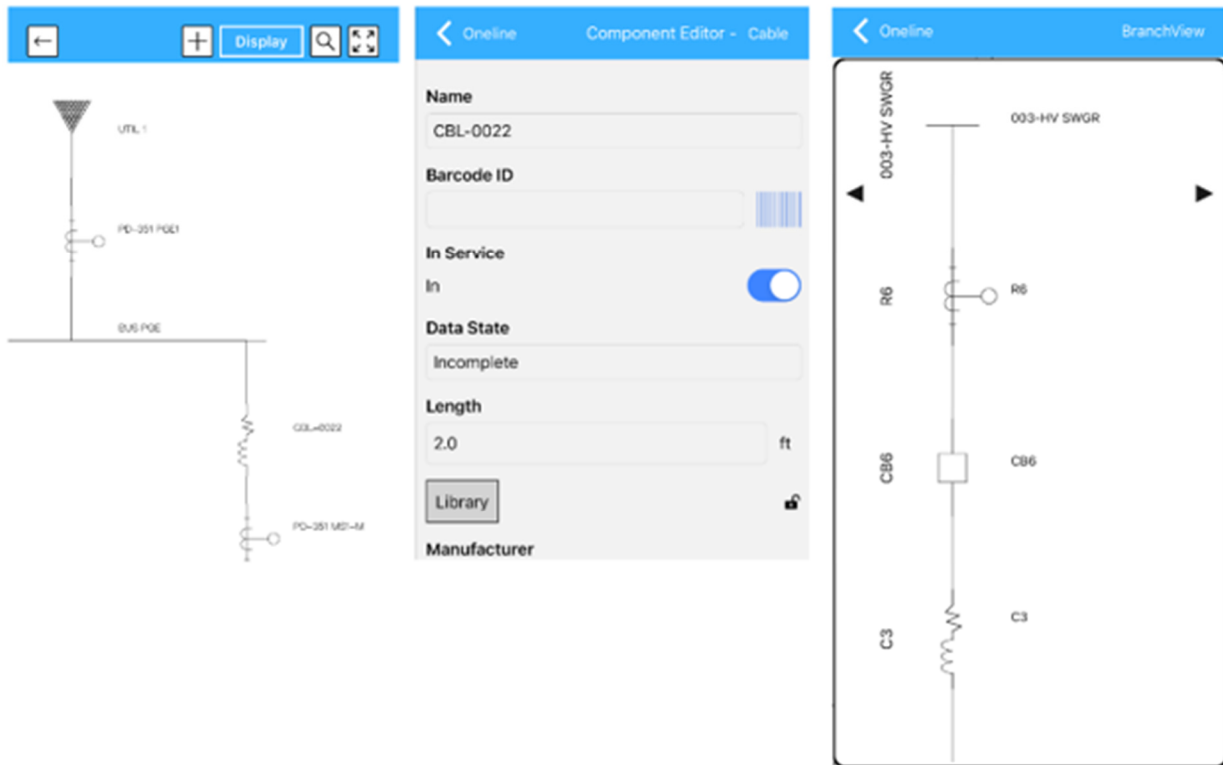

SKM Mobile App Overview

SKM Mobile App (iOS and Android)

The SKM Mobile app provides an intuitive experience that lets you collect field data, review study results, and share projects with others wherever you are in the palm of your hands. Use SKM Mobile app on your mobile or tablet devices! The SKM Mobile app is available for iOS and Android devices and can be purchased from their respective stores. Search for “SKM Mobile” in the Apple or Google Play Stores.

The SKM Mobile app allows engineers to create new projects from the field and upload them to their MySKM account – to be later imported into the PTW desktop program in order to perform power analysis studies. Engineers can also view & edit PTW projects modeled on the desktop program on the mobile app.

Users may view equipment settings & specifications along with study results such as arc flash incident energies and PPE clothing.

MySKM Cloud Subscription

The SKM Mobile app works in hand-in-hand with a MySKM Cloud subscription. Mobile app projects can be uploaded to your MySKM account. Once there, it can be imported into the SKM PTW desktop software to conduct various power system analysis.

SKM PTW desktop projects can also be uploaded to MySKM Cloud to be imported into the SKM Mobile app. This will allow field engineers to verify equipment settings and study results, such as available short circuit results, incident energy, required PPE selection, and more!

Benefits of SKM Mobile App + MySKM Cloud Subscription:

1. Transfer field data directly to SKM without having to write anything down on paper.
2. Take pictures, videos, audio, scribble notes and save with each equipment.
3. Download mobile projects into SKM software to update existing components or add new equipment.
4. Upload SKM projects to the mobile app for field engineers to view study results.
5. Scan QR equipment codes to quickly locate the component on the mobile app to view equipment details and study results.
6. View entire power system one-line while in the field in the palm of your hands!

Licensing Notes:

1. To have full functionality of the SKM Mobile app, users must subscribe to a MySKM Cloud subscription.
2. Without a MySKM Cloud subscription, SKM Mobile app users will only be able to create and modify new projects that they create on the app. This is useful for field engineers that need to perform asset management and auditing and do not need to share project data. Users will not be able to upload mobile app projects to be used in the PTW desktop software. Users will also not be able to download PTW desktop projects into the SKM Mobile app to view equipment data or study results.
3. MySKM Cloud subscription requires annual renewal. All project data uploaded to a MySKM Cloud account will be permanently deleted if the subscription is not renewed.
4. MySKM Cloud subscription accounts are not transferrable and cannot be shared with other individuals.

MySKM Cloud Subscription

To get started after you have subscribed to MySKM Cloud, create online user profiles (if needed) under your Customer account and add it to Cloud Access.

1. Go to www.skm.com and click on My SKM on the top header. Login to your account.
2. To create new users, click on Online User Profiles.

The screenshot shows the MySKM Cloud Subscription dashboard. The navigation bar includes the SKM logo and buttons for Home, Products, Support, Training, Contact, and My SKM. The main content area is divided into five sections:

- Transactions:** Retrieve Transactions, Print Invoices, Submit Payment.
- Licenses:** Access License Information, Add on to the License, Calculate Maintenance Fee, Download Software, Obtain Enabling Code.
- My Profile:** Maintain Your Online Profile, Change Your Password, Maintain Your Subscriptions.
- Online User Profiles:** Add online users & securities, Maintain online users & securities. A red arrow points to this section.
- Cloud Projects:** Download uploaded contents, Maintain uploads, Maintain upload Securities.

The screenshot shows the 'Online User Profile' page. The navigation bar includes the SKM logo and buttons for Home, Products, Support, Training, Contact, and My SKM. The main content area is titled 'Online User Profile' and includes a link 'Add new online user'.

Show inactive users also

Name	Email	Type	Status
Johnny	sales@skm.com	Customer	Active

3. Once users have been created, return to the main screen and click on Licenses. After this step, users can start upload and downloading cloud projects from the Mobile app and PTW.

The screenshot shows the MySKM web application interface. At the top, there is a navigation bar with the URL <https://www.my-skm.com/MySKM.aspx>, contact information (1-800-500-4SKM, sales@skm.com), and links for Shopping Cart and Logout. Below the navigation bar is the SKM Systems Analysis, Inc. logo and a row of six menu buttons: Home, Products, Support, Training, Contact, and My SKM. To the right of these buttons is a 'CELEBRATING 50 YEARS OF EXCELLENCE' badge. The main content area is divided into five panels: Transactions, Licenses, My Profile, Online User Profiles, and Cloud Projects. The Licenses panel is highlighted with a red arrow pointing to the 'Download Software' option.

Transactions

- Retrieve Transactions
- Print Invoices
- Submit Payment

Licenses

- Access License Information
- Add on to the License
- Calculate Maintenance Fee
- Download Software
- Obtain Enabling Code

My Profile

- Maintain Your Online Profile
- Change Your Password
- Maintain Your Subscriptions

Online User Profiles

- Add online users & securities
- Maintain online users & securities

Cloud Projects

- Download uploaded contents
- Maintain uploads
- Maintain upload Securities

Licenses

The screenshot shows the 'Licenses' page for license 1085. The license details are: Dapper for 1,000 buses and 1 user; Add-on: 1 HI_WAVE, 1 I*SIM, 1 Reliability, 1 MySKM Mobile Cloud; Sold on: Dec 13, 2016; Key: USB LAN DL; Next maintenance fee due: Dec 31, 2030. On the right side, there are three buttons: 'Company Profile', 'Download Software', and 'Assigned Cloud Access'. The 'Assigned Cloud Access' button is highlighted with a red box.

1085:

Dapper for 1,000 buses and 1 user
Add-on: 1 HI_WAVE, 1 I*SIM, 1 Reliability, 1 MySKM Mobile Cloud
Sold on: Dec 13, 2016
Key : USB LAN DL
Next maintenance fee due: Dec 31, 2030

Assigned Cloud Access

The screenshot shows the 'User Assignments' dialog box. It displays the license name 'MySKM Mobile Cloud - Number Of LAN Users: 1' and states 'These Users can perform Upload/Download from Mobile App, PTW/PTX'. A list of users is shown with a checked box next to 'sales@skm.com'. At the bottom, there are 'Save' and 'Cancel' buttons.

MySKM Mobile Cloud - Number Of LAN Users: 1

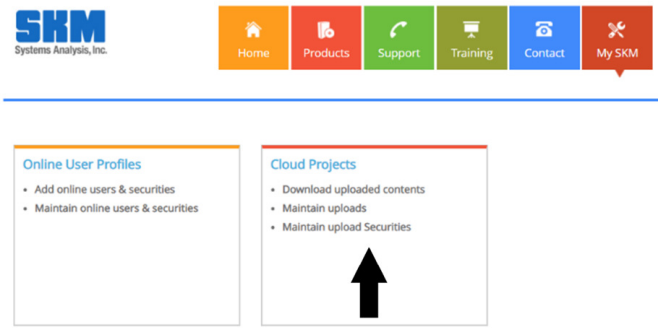

These Users can perform Upload/Download from Mobile App, PTW/PTX

- sales@skm.com

Save Cancel

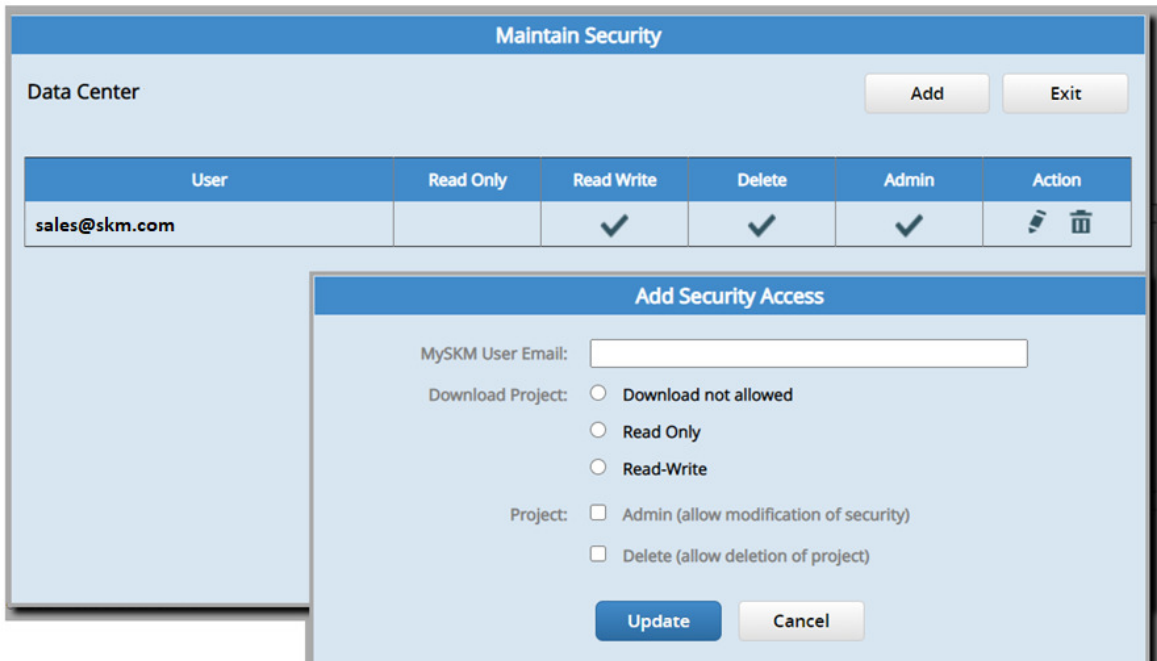

Cloud Project Security:

Projects are stored in the “Cloud Projects” tab.

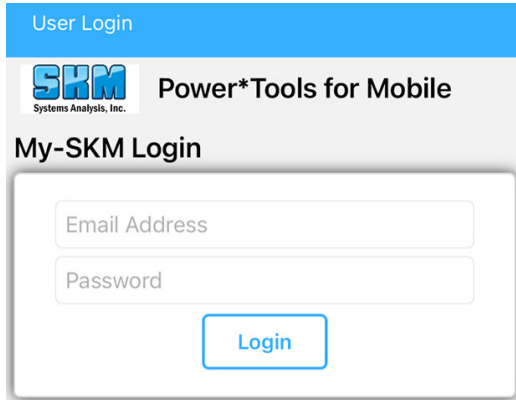

Each Cloud project has a “Maintain Security” interface to add more users and control permissions.

Users can also download the projects for manual importing into PTW, sharing, or archiving.

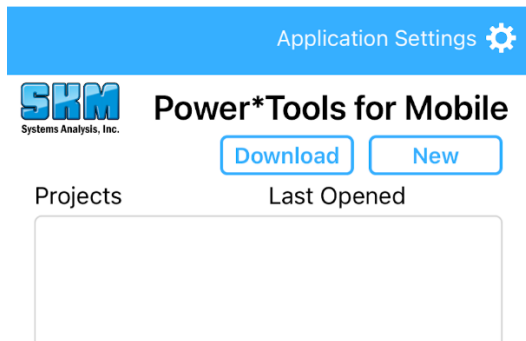

Starting the Mobile App for the First Time

When starting up the SKM Mobile App, enter your registered MySKM email address and password. If you do not have a MySKM email address, visit skm.com and click on My-SKM location on the top header menu.

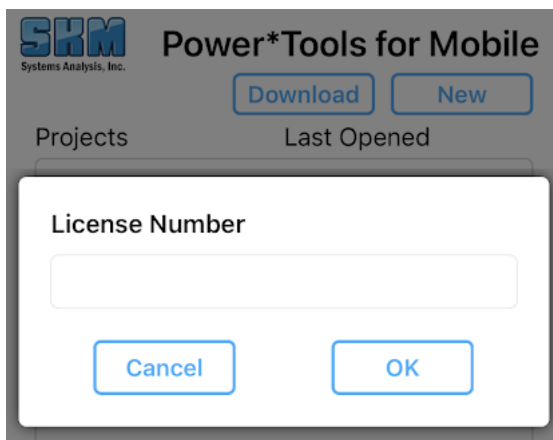

The screenshot shows the 'User Login' screen. At the top, there is a blue header with the text 'User Login'. Below the header is the SKM logo (Systems Analysis, Inc.) and the text 'Power*Tools for Mobile'. Underneath, it says 'My-SKM Login'. There are two input fields: 'Email Address' and 'Password'. A blue 'Login' button is positioned below the password field.

Clicking on the New button will create a new Project.

The screenshot shows the 'Application Settings' screen. At the top, there is a blue header with the text 'Application Settings' and a gear icon. Below the header is the SKM logo (Systems Analysis, Inc.) and the text 'Power*Tools for Mobile'. There are two buttons: 'Download' and 'New'. Below the buttons, there are two columns: 'Projects' and 'Last Opened'. A large empty rectangular box is positioned below these columns.

Clicking on the Download button will prompt for a License Number. Enter the License Number that contains a MySKM Cloud Subscription. After logging in, a list of projects in the MySKM cloud account (if projects exists) will be shown for downloading into the mobile app.

The screenshot shows a dialog box titled 'License Number'. It has a text input field for entering the license number. Below the input field are two buttons: 'Cancel' and 'OK'.

List of projects available for download from MySKM cloud account. Click on project name to start download into the mobile app. (Below is a sample list)

Online View

- The Online View shows the entire power system graphically.
- Online layout is automatically drawn and fixed by the app and layout is continuously enhanced through updates.
- View Datablocks for each components by clicking on the “Display” button.
- Pan and zoom using finger gestures.
- Single tap on component to show the Component Editor.
- Double tap to show the Branch View.

Menu functions on the top of the Online View:

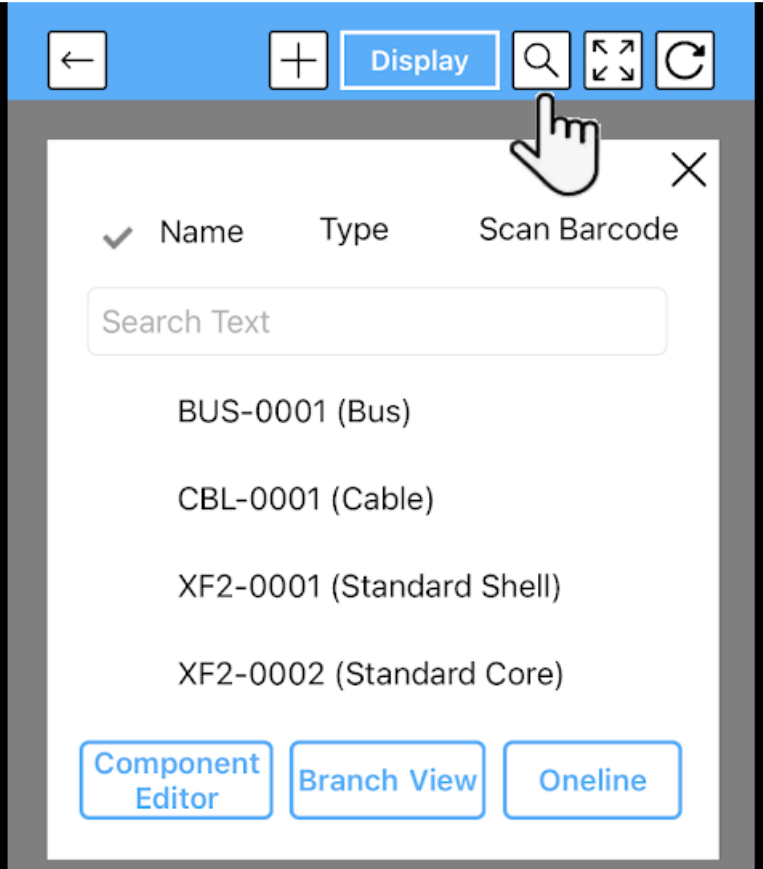

Clicking on the “Display” button displays a list of available Datablock Formats. New Formats are continuously added through app updates.

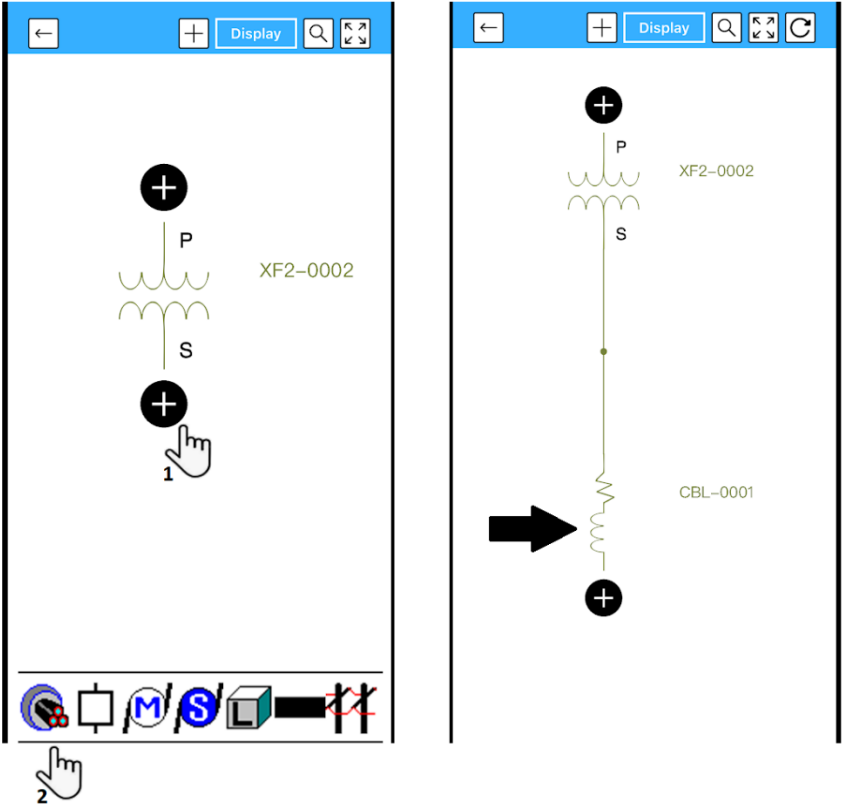

The Search feature allows searching by Name, Type, and Barcode. Once a component is selected, click on 1 of the 3 buttons (Component Editor, Branch View, Online)at the bottom to go directly to that component in that particular view.

When a physical equipment has a barcode sticker and the barcode is stored in the app, the user can scan the barcode using the device camera to instantly locate it on the online.

Clicking on the + button on an unconnected end of a component will bring up a carousel of components. Clicking on any components in the carousel will automatically connect it to the existing component.

Component Editor View

- Shows component properties in detail.
- Some equipment has a library available for ease of data entry.
- Capture rich format media and store with the component.

Component Editor - Cable

Name: CBL-0022

Barcode ID: [Barcode Icon]

In Service: In [Toggle]

Data State: Incomplete

Length: 2.0 ft

Library [Lock Icon]

Manufacturer: Typical

Installation: [Field]

Cond Desc: 4 Wire+Grnd

Conductor in Parallel / Phase: 2

Volts (L-L): 22000

Cable Size: 500 kcmil

System Nominal Voltage: 21600

Buttons: Other, Media, Exit

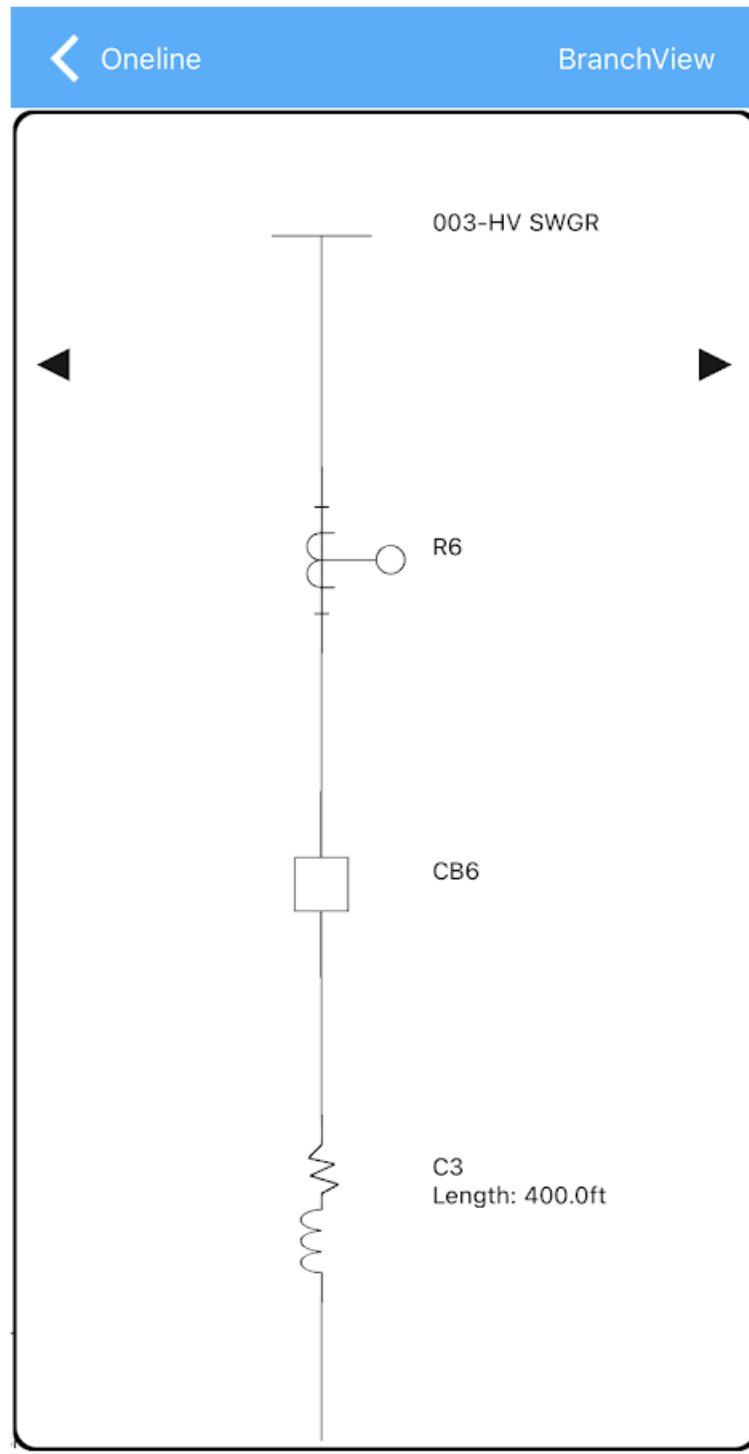

The “Media” button will allow capture rich content and save it with the component:

I would like to

- Take a Picture
- Record a Video
- Draw / Handwrite
- Record an Audio Note
- Attach Existing Pictures
- Attach Existing Videos
- Scan a QR code

Branch View

- The Branch View provides a closer look at a smaller portion of the system – one branch at a time.
- Swiping left or right on the screen will show the next branch.
- Single click on any component will display the Component Editor.

Uploading Mobile App Projects into MySKM Cloud

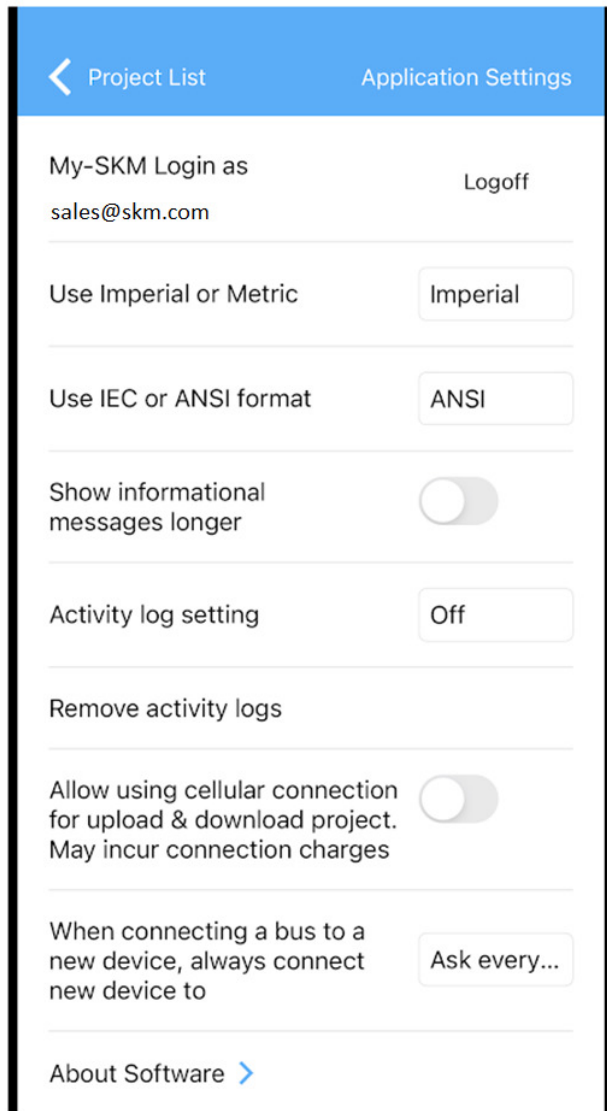

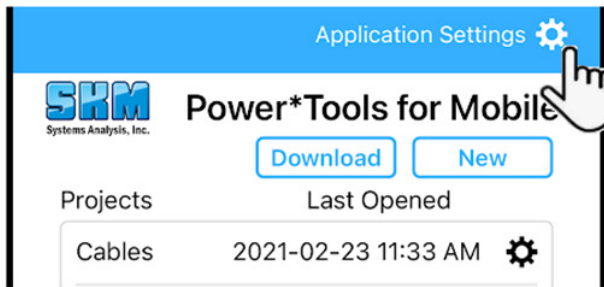

On the Project List interface, click on the gear icon. On the next page, click on the cloud button next to “Upload to MySKM Cloud”.

Once uploaded successfully, users will be able to download the mobile app project from within the desktop PTW software. Users will also be able to view it in their MySKM account on skm.com and assign users and permissions to the project.

The image displays two screenshots from the SKM software interface. The left screenshot shows the 'Application Settings' screen for 'Power*Tools for Mobile'. It features a 'Download' button and a 'New' button. Below these, there is a table of projects with columns for 'Projects' and 'Last Opened'. A project named 'Cables' is listed with a last opened date of '2021-02-23 11:33 AM' and a gear icon next to it, which is being clicked by a hand cursor. The right screenshot shows the 'Project List' screen with the 'Project Settings' for the 'Cables' project. It includes an 'Upload to MySKM Cloud' button with a cloud icon and a hand cursor, a 'Project Name' field, and several settings: 'Use Imperial or Metric' (set to Imperial), 'Use IEC or ANSI format' (set to ANSI), 'When connecting a bus to a new device, always connect new device to' (set to Ask every...), 'Shrink Horizontal Spacing from Online' (checked), 'Number of Buses' (30), 'Total Number of Components' (143), 'Project ID' (835E13AB-8, 905-43B3-9, 4CE-0A98DA, EB1F0B), and 'SKM Database version' (v1.0.1). A 'Delete Project' button is at the bottom.

Application Settings

Make general mobile app setting changes, such as for Units and Standards.

Power*Tools for Windows (PTW32) Desktop Software

The SKM Mobile app and MySKM Cloud Subscription is also integrated within the PTW32 Version 10.0 desktop software.

Once a mobile app project has been uploaded to your MySKM Cloud account, you can download it for use within an existing or new PTW32 project. Once a PTW32 project is opened, click on the Project menu > MySKM Cloud Projects download projects. (The MySKM Cloud subscription must be in the license in order to use this feature.)

Existing PTW32 desktop projects can also be uploaded to your MySKM cloud account to be used on the SKM Mobile app. Simply click on the "Upload to MySKM" button. Once the upload is finished, the PTW32 project can be found in the Download page of the SKM Mobile app and in your MySKM Cloud account.
